

Ulead Movie Wizard

Makes Your Movies For You

Features & Benefits

Ulead® Movie Wizard is ideal for beginners to video editing. Let the Movie Wizard assemble video clips and photos, add background music and titles, then output a finished movie. Simply choose a preset theme such as romantic, travel, celebration, wedding or holiday and quickly personalize them with your own photos and video.

Add Video and Images

- **Insert Video** adds video files of different formats such as AVI, MPEG, and, WMV.
- **Insert Image** adds still images. (You can create a photo slideshow if you choose to only add images.)
- **Insert DVD/DVD-VR** adds video from a DVDVideo or DVD-VR formatted disc.
- **Change Clip Sequence** allows users to arrange the order of video clips.
- The **Media Clip List** contains all the video and image clips that users have selected for their movie. Clips can easily be rearranged by dragging them into the desired sequence.
- Preview selected clips using the **Jog Bar** and **Navigation Panel** buttons.
- **Auto Edit Options** offers users two automatic editing options.
 - **Split by scene** automatically splits lengthy video clips into smaller clips based on their shooting dates and times.
- **Auto trim** allows the wizard to analyze individual clips and automatically removes poorly-shot scenes. It also studies the rhythm of a music tracks and arranges video clips accordingly.
- **Capture video from camcorder** by clicking the **Capture** tab in the VideoStudio Movie Wizard.
- **Video Format** for home movies can be selected from a wide variety of standard video formats.
- **Capture a still image** from the video footage.
- The **Navigation Panel** gives users direct control over their digital video (DV) camcorder.
- **Stylish templates**, each with a different theme, come with preset starting and ending video clips, transitions, title and background music.

Use Stylish Templates

- **Customize the overall length of a movie** with a variety of automatic options provided by the wizard.
 - **Fit to video duration** keeps the current movie duration.
 - **Fit to background music** adjusts the movie duration to fit into the length of the background music. (The background music is added to the movie in the second step of the Movie Wizard.)
 - **Specify duration** lets users define a custom duration for the whole movie.
- **Volume slider** adjusts the volume of the background music with respect to the video's audio. Dragging the slider to the left increases the volume of the background music and decreases the volume of the video's audio.
- **Text Properties** gives users control over font type, size and color for the text, as well as, set the desired shadow color and transparency.
- **Create Video File** allows users to output their movie as a video file that can be played back on any computer.

Finish

- **Create Disc** burns the movie directly onto a disc.
- **Edit in Ulead VideoStudio Editor** gives users the opportunity to make further edits to their movie using the VideoStudio Editor.
